

## **Post Hurricane Information:**

### **Storm Debris:**

- The Town is accepting hand-carried limbs and small branches at Kellams Field where a chipper is available today through the rest of the week during business hours (8:00 am to 5:00 pm). This service is for the citizens of the town who are clearing their debris. No tree contractors will be allowed at Kellams Field.
- We are relaxing the guidelines regarding “bundled and tied branches” and you may pile your small branches and limbs at your curb and the Town will pick them up as soon as they can and no later than September 9<sup>th</sup>. No tree trunks – only branches.
- Trash pick-up will operate on the regular schedule.

### **Beach:**

- Brownie’s Beach is open and is now staffed.

### **BGE:**

- We do not have a timeline as of now regarding when power will be restored. 35 crews are working in the town to restore power as soon as possible.
- Richfield Station and Chesapeake Village, as well as some homes south of town are still without power.

### **Richfield Station:**

- Some homes in Richfield Station have grinder pumps and are unable to operate their toilets and showers. The town has ordered Porta-Johns which will be placed at various locations in Richfield Station, unless power is restored today.
- The Chesapeake Beach Water Park has opened for toilets and showers. If you go to the Water Park, please bring your own towels and you may wish to bring your own soap, shampoo and flip flops.
- As an alternative, if you are on a grinder pump, you may want to call a plumber or septic service and have your grinder pit pumped-out. There is, of course, normally a fee for this service. You might consider getting a group together (neighbors) for a possible discount.

### **Roads:**

- Highway 261 is closed south of town from Chesapeake Village and Randle Cliff. An alternative route to head south would be to take Rt. 2. (Lines are down in this area.)
- Old Bayside Road is now cleared.

### **Supplies:**

- Ice and other supplies are available at all of the usual outlets.
